Scratch & Chip Removal System

• Key Features

- Removes surface scratches & stone chips from all types of paint.
- Quick and easy to use
- Suitable for all cars and for any painted surfaces including metallic.

• Product Information

Farécla Smart Scratch and Chip Removal System Liquid has been used extensively by trade professionals and is now available for use by the consumer. The contents of this kit are tried and tested solutions to paintwork problems. The system removes surface scratches and stone chips from all types of painted surfaces, including metallic.

• Application Instructions

- To remove minor scratches, apply Farécla Scratch Remover Paste in straight forward and backwards movements (not circular) with a damp cloth, applying even pressure. When suitable finish is achieved, remove any residue and buff with a soft dry, lint free cloth.
- For instructions on how to remove more serious scratches and advice regarding paint types, please consult product packaging.
- Finish with Farécla Hi gloss Wax.
